Do's for Content Template

- Use promotional category for communications intended to be sent from numerical sender id only.
- Transactional category to be used by banking enterprises only & for OTP messages during fund transfer; online payment; merchant transaction only.
- Choose a relevant/recognizable name for templates
- Use the message type as "TEXT" for all general messages & "Unicode" for regional messages.
- Variable {#var#} insertion to be required against values like the date; amount; a/c no; OTP; names; etc...

Don'ts for Content Template

- Header selection against irrelevant templates.
- Selecting the "Transactional" category by non-banking enterprises.
- Invalid variable format in templates.
- Using double spaces in templates (this can be pre-checked by verifying the template on notepad++ before template submission).
- Templates with less than 6 char or variable insertion alone as a template.
- Do not use external fonts or characters other than those that appear on the keyboard.

Content Template Validations

- 2 or more spaces are not supposed to be used between 2 words, before a word or after a word.
- All special characters (found on the keyboard) are allowed, except < and > symbols.
- The variable format is {#var#} which is case sensitive
- Variable can be inserted by clicking the radio button (insert variable) above the text box
- Trans/Service category messages should have variable mandatorily.
- Promo category can have complete fixed content or with a variable part
- There is no limitation in no. of variables per message but each variable length can't exceed 30 chars
- Values like amount, date, a/c no, merchant names, OTP, codes, URL, customer names, card type, etc. need to be replaced with variables.
- If the template you're trying to register is already registered with the portal, it would show the error "Template Message already registered (Template Name ****)"
